Skills

Languages: C/C++, Java, JavaScript, TypeScript, SQL, Python, Golang

Technologies & Tools: React, Redux, Next.js, Node.js, AWS, EC2, DynamoDB, S3, ECS, Lambda, Docker, Kubernetes, Spring Boot, Github Actions, GitLab, CI/CD, Redis, Kafka, GraphQL Federation.

Work Experience

WhatBytes

Sep 2025 - Present

Django Backend Developer – Intern

- Designing and implementing scalable, secure, and high-performance backend systems using Django and Django REST Framework (DRF).
- Building and optimizing RESTful APIs, including authentication, role-based access control, and secure session management.
- Optimizing PostgreSQL database queries to ensure fast and efficient data retrieval for high-performance applications.

Talent Corner HR Services Pvt. Ltd

Apr 2025 – Jul 2025

Full Stack Developer - Intern

- Built and deployed full-stack lead management and data scraping platforms, including React frontend and Node.js backend.
- Engineered lead verification and enrichment pipelines using Node.js and MySQL to ensure accurate, deduplicated data.
- Developed reusable React dashboard components within a modular controller-service architecture for maintainable and consistent UI

Education

Bhartiya Vidya Bhavans – Mumbai

Jul 2022 – Apr 2025

Bachelors in Computer Science

(CGPA: 9.5/10)

Relevant Coursework: Object Oriented Programming, Databases, Discrete Maths, Data Structures and Algorithms, Operating Systems, Computer Networks, Game Programming, Advance Data Structures and Algorithms, Information Retrieval, Image Processing

Project Work

- [ShopxIndia](#): Developed a microservices-based e-commerce backend using Apollo GraphQL Federation and AWS CI/CD (CodeCommit, CodeBuild, CodePipeline, CodeDeploy) deployed on ECS Fargate. Implemented secure networking, storage with S3 and RDS, caching with ElastiCache, and monitoring via CloudWatch and SNS.
- [SocialPedia](#): Built a full-stack social media platform using React, Node.js, MongoDB, and Redux, featuring real-time messaging with WebSockets, user profiles, posts, and JWT-based authentication with a responsive UI using Bootstrap.
- [FileShareX](#): Created a file-sharing web application with React, Node.js, and MongoDB, integrating QR code-based downloads and SMTP email sharing for seamless file distribution.
